DETAILED ACTION

Claims 1, 3-9, 11-20, and 22-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, as amended, it is not clear what is meant by the first part of the channel being "substantially external" to the second part of the channel. How would one part of a channel be external to another part? Does this mean simple that there are two identifiable regions? Or would the regions have to be non-contiguous? Can they be touching one another, or does this term mean that they are not in contact?

Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1 and 3-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Cheng et al.

See reasons of record in the previous Office action. With respect to the amendment, the previously identified "third region" would now be identified as the "second region." The "third region" could be associated with any part of the channel, because no limitations are provided in these claims on the location or function of this region.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 6-9, 11-13, and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cheng et al. in view of Lin et al.

See reasons of record in the previous Office action.

Conclusion

Applicant's arguments submitted with respect to the rejected claims have been considered, but are not convincing. Applicant points out a number of difference between the invention of Applicant's specification and the prior art. Examiner is substantially in agreement with most of the points made. But there is no specific claim language ties to any of the differences relied upon for patentability. Note that all claims are expressed in open claim language. Also, the properties set forth for the various regions of claim 1, for example, do not preclude other regions from possessing the same property. (The "first gate segment," for example, need not be formed only over the first part of the channel region, it could be formed elsewhere as well. The field-oxide stripe need not be formed only over the second part of the channel region, it could be formed elsewhere as well.) So the rejection is based merely on a broad reading of the claim language.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
